

Global Diversified Aggressive Portfolio

INVESTMENT STRATEGY:

The Global Diversified Aggressive Portfolio (GDAP) follows an opportunistic investment strategy. The objective of this investment portfolio is to aggressively exploit global capital market investment opportunities. This investment portfolio provides exposure to stocks, bonds, cash and diversifying assets. This investment portfolio is suitable for investors with a high risk tolerance and an investment horizon that is greater than 10 years.

S&P 500:	1.17%	46.99%	-2.19%	32.19%	20.30%

This model portfolio has been developed based on historical performance of various standard asset classes (stocks, bonds, cash and diversifying assets) and of representative market index fund measures. Since this is a model portfolio, there can be no assurance that an investor would have achieved similar rates of return over the time frame. In addition, since the time period in question is a historical one, there can be no assurance that future results achieved by an investor will in any way resemble those represented by this model portfolio.

The performance tables above are representative of a compilation of selected investment vehicles to achieve a probabilistic return for a measured level of risk. All performance data is total returns which includes interest and dividends.

Although we have done our best to present this information fairly, model portfolio performance is still potentially misleading. Model portfolio data does not represent actual performance and should not be interpreted as an indication of actual performance. This data is based on transactions that were not made. Instead, the trades were simulated, based on knowledge that was available only after the fact and thus with the benefit of hindsight. Results do not include the impact of taxes, if any. Past returns are not indicative of future results.

These materials are subject to change without notice and, due to the rapidly changing nature of the security markets, may quickly become outdated. All materials presented are compiled from sources believed to be reliable and current, but accuracy cannot be guaranteed. This information is not to be construed as an offer, solicitation, recommendation, or endorsement of any particular security, product, or service.

The S & P 500 Index is an unmanaged, capital-weighted index representing the aggregate market value of the common equity 500 stocks primarily traded on the New York Stock Exchange (NYSE).
